

20 Feet Pallet Trailer 32,000 Kg Capacity

Model: 32TESL-01

✓ Main Features

- ➔ **Specialized Design:** Engineered specifically for transporting large loads such as aircraft engines and oil exploration equipment.
- ➔ **High Capacity:** Offers a 32,000 kg capacity with both side and end loading capabilities.
- ➔ **Versatile Functionality:** Combines the functionality of two trailers into one, enabling both side and end loading.
- ➔ **Load Handling:** Accommodates: 2 ea. 88"x125"; 2 ea. 96"x125"; and 1 ea. 96"x196".
- ➔ **Robust Construction:** Main chassis constructed from 11 mm structural steel (BS4360 GR40).
- ➔ **Durable Ball Transfer Units:** Equipped with 45Ø mm stainless steel ball transfer units from Alwaysse (UK), each with a capacity of 600 kg.
- ➔ **Impact Protection:** Side and end rollers made of 4 mm thick steel for enhanced load impact resistance.
- ➔ **Enhanced Braking System:** Dual push rods on rear wheels for braking, activated by the tow bar in either down or upright positions.
- ➔ **Solid Tyres:** Supported by 36 solid tyres (16x5-9) for superior durability.
- ➔ **Secure Pallet Locks:** Outer pallet locks are butterfly-type with extended round handles for ease of use.
- ➔ **Ergonomic Tow Bar:** Features an 'A' frame tow bar with an 80 mm diameter tow eye and lifting handle.
- ➔ **Quality Finish:** Surface is peened, primed, and finished with two top coats for long-lasting protection.
- ➔ **Safe Walkways:** Checker-plate walkways with safety yellow lines painted along the edges.
- ➔ **Safety Infill Plates:** Installed throughout the trailer to provide secure footing.

✓ Optional Features

- ➔ **Hot-Dip Galvanizing:** For enhanced corrosion resistance.
- ➔ **Tow Bar Stand:** Provides additional convenience.
- ➔ **Tie-Down Anchor Points:** For securing loads effectively.

**Unique Design: Capable of Both
End and Side Loading**
